the role of orthography in reading and writing is not a new topic of inquiry for example in 1970 venezky made a seminal contribution with the structure of english orthography in which he showed how both sequential redundancy probable and permissible letter sequences and rules of letter sound correspondence contribute to orthographic structure in 1980 ehri introduced the concept of orthographic images that is the representation of written words in memory and proposed that the image is created by an amalgamation of the word s orthographic and phonological properties in 1981 taylor described the evolution of orthographies in writing systems from the earliest logographies for pictorial representation of ideas to syllabaries for phonetic representation of sounds to alphabets for phonemic representation of sounds in 1985 frith proposed a stage model for the role of orthographic knowledge in development of word recognition initially in the logographic stage a few words can be recognized on the basis of partial spelling information in the alphabetic stage words are recognized on the basis of grapheme phoneme correspondence

in the orthographic stage spelling units are recognized automatically without phonological mediation for an historical overview of research on visual processing of written language spanning the earliest records of writing to the early work in experimental psychology see venezky 1993
